

Isaac Spinks  
Assignment00

1. What happens when you do git stash?
  - a. Saves any changes you do to a temporarily to a stack
2. What do you see when running git log --all --oneline
  - a. You will see a list of all commits in the repositories history
3. Run git stash pop to undo what you did with git stash. In what scenario might this be useful?
  - a. reapplies the most recently stashed changes from the stash stack back onto your working directory, would be useful if you need to continue working on something that is saved to the stack.
